Graph-Ex™ may be applied to seed using two methods of application, bulk or planter box.

BULK APPLICATION:

Apply one half (0.5) ounce by weight (one measuring cup as provided) per 50 lbs. seed, by manually or mechanically dispersing Graph-Ex into a flowing stream of seed. Ensure that Graph-Ex is evenly dispersed in the planter or drill box.

PLANTER BOX APPLICATION:

Apply one half (0.5) ounce by weight (one measuring cup as provided) per 50 lbs. seed into planter or drill box. Mix seed until uniform coverage is obtained. It is best to treat and mix seed in 50 lb. increments.

For optimal performance, plant seed within 72 hours of application.
DO NOT EXCEED 72 HOURS without re-inoculating seed.
